## PETITION FOR RULE MAKING

Mr. Thomas J. Lijewski (Petitioner), by his attorney, respectfully submits his petition for Rule Making which seeks to allot FM Channel 238C1 to Bemidji, Minnesota, as an additional service. In support whereof, the following is respectfully submitted:

1) The geographic coordinates of Bemidji place it within Zone II, as defined by Section 73.205(c) of the FCC Rules. Accordingly, the allotment of a class C1 channel to Bemidji is permitted.

2) According to the enclosed Table 1.0 allocation study, Channel 238C1 would meet Section 73.207's spacing requirements as to all other facilities requiring protection consideration.

3) No site restriction is required for this allotment and this proposal will provide required city grade coverage to Bemidji.

## ENGINEERING STATEMENT

This engineering statement is prepared on behalf of Thomas Lijewski in support of a petition for rulemaking requesting that FM Channel 238C1 be allotted to Bemidji, Minnesota, as an additional FM service. The geographic coordinates of Bemidji are:

NL - 47° 28' 24"  
WL - 94° 53' 00"

This places Bemidji within Zone II, as defined by Section 73.205(c) of the FCC Rules. Accordingly, as outlined in Section 73.210(a) of the FCC Rules, the allotment of a Class C1 channel to Bemidji is permitted.

Table 1.0 is an FM allocation study for Channel 238C1 from the reference coordinates noted above. As shown in this table, operation on Channel 238C1 from these reference coordinates would meet the spacing requirements to all other facilities requiring protection consideration. It should be noted that, under the rounding provisions of Section 73.208(c)(8) of the FCC Rules, the 210.68 kilometer spacing to KBK - Mora, Minnesota, is considered to comply with the required spacing of 211 kilometers. Since no site restriction is required for this allotment, it is obvious that this proposal will provide the required city grade coverage to Bemidji.

In summary, Channel 238C1 can be allotted to Bemidji, Minnesota, in compliance with all applicable spacing requirements, without the need for a site restriction.
